

Liquid Fertiliser Tanks

With Tunetanken Liquid Fertiliser Tanks you get a complete storage solution, which has been developed to ease the handling of liquid fertilisers. Liquid Fertiliser Tanks are made from a robust and corrosion free composite material, which, along with the fully moulded design, makes the tank resistant to corrosive fertilisers and minimises the risk of leakage. All this ensures a long life cycle for your tank and requires only minimal maintenance.

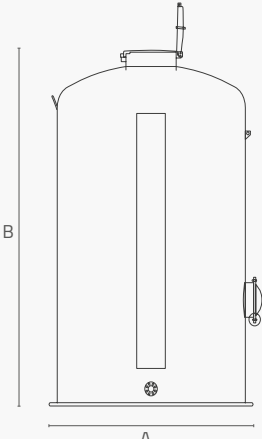

Equipment

- > Manhole Ø 800 mm with a hinged ventilation cover, hasp and eye, and a handle.
- > Ladder hook.
- > Lifting lugs.
- > Level indicator.
- > Manhole Ø 500 mm with a gasket and a cover.
- > Flange studs DN80 outlet.
- > Anchoring edge.

Design

- > Density: 1,35.
- > Temperature: +/- 50°/100° C in operation.
- > Chemical resistance.
- > Standard colour: Grey-White (RAL 9002).

Illustration	Type	Volume	Diameter (A)	Total height (B)
	GT5	5,000 ltr.	1,600	2,400
	GT10	10,000 ltr.	2,000	3,200
	GT15	15,000 ltr.	2,400	3,400
	GT20	20,000 ltr.	2,400	4,700
	GT25	25,000 ltr.	3,000	4,000
	GT30	30,000 ltr.	3,000	4,800
	GT35	35,000 ltr.	3,000	5,500
	GT40	40,000 ltr.	3,000	6,900
	GT45	45,000 ltr.	4,000	4,200
	GT50	50,000 ltr.	4,000	4,700
	GT55	55,000 ltr.	4,000	5,300
